The QuickInsite report looks at a user-defined geography and consists of StoryView and ThemeView sections. The StoryView displays overall demographic information, such as population, educational attainment, median family income, and diversity. The ThemeView goes into more detail about your study area’s demographics, their changes over time, and Mosaic Lifestyle Segmentation Types.

This report doesn’t display every demographic variable. For a comprehensive view of your area’s demographics, run the ExecutiveInsite report. To learn more about your area’s beliefs and preferences, run the MinistryInsite or ReligiousInsite reports.

### Correlating the StoryView and DetailView Reports

The Detail View Report presents the important demographic detail behind the Demographic Indicators found on the QuickView page. It is organized around six themes.

DetailView Themes	StoryView Number	DetailView Themes	StoryView Number
1. Population, Households & Families	1 & 3	4. Community Diversity	5 & 9
2. Age	2	5. Financial Resources	6 & 7
3. Education/Career Status	4 & 8		

### Interpreting the Report

The QuickInsite report is formatted to help you interpret data at a glance.

#### Change over time

Several trend tables have a column indicating a change over time. Generally these tables begin with the last census, include the current year estimate, a five year projection and if available, a 10 year forecast. The data in each cell represents a percentage change up or down.

#### Color Coding

Both the "Change over Time" and "Comparative Indexes" columns are color coded so you can easily spot changes and the direction of change.

Description	Color
Above Average	Green
Below Average	Red

#### Variable Definitions

Full variable definitions can be found in the MI Demographic Reference Guide. Download it free from the Help/Documents menu located on the map screen of your study area on the MissionInsite website.

#### Support Documents

To open a link in a new tab, hold the Ctrl key on your keyboard while clicking.

[Click to download the QuickInsite Worksheet](#)

#### Indexes

Some variables will have a column called "Comparative Index." An index is an easy way to compare a study area with a larger area. For this report, all comparisons are with the state or states within which the study area falls. The indexes can be interpreted as follows.

- Indexes of 100 mean the study area variable is the same as its base area.
- Indexes greater than 100 mean the study area variable is above the base area. The higher the number, the greater it is above the base.
- Indexes less than 100 mean the study area variable is below the base area. The lower the number, the greater it is below the base.
